Student's Pass holder | Available part-time during term; full-time from July 2027

SUMMARY

Accounting graduate and master's candidate with a quantitative foundation in operations research and applied statistics, reading MSc Accountancy (Data Analytics) at Nanyang Technological University, Singapore. Two internships in China - external audit and construction-sector corporate finance - centred on one recurring problem: reconstructing dispersed transaction records into figures able to withstand review. Rebuilds those data trails in Python, Excel and SPSS, delivering reconciliations, variance analyses and audit screening analytics.

TECHNICAL SKILLS

- **Python:** data cleaning and grouped aggregation with pandas, CSV and file parsing, function encapsulation; two published projects - an audit-style analysis of 18,464 government procurement records and a voucher validation and reconciliation toolkit.
- **Analytics methods:** supplier concentration (HHI / CR4), Benford's law testing, threshold clustering, reconciliation logic, mixed-integer programming.
- **SQL:** foundations in progress through the NTU MACC data analytics curriculum.
- **Excel:** PivotTables, INDEX-MATCH / VLOOKUP, SUMIFS / COUNTIFS, data cleaning, charts and dashboards.
- **SPSS, Stata, Yonyou U8:** reliability and validity testing, correlation and regression analysis; voucher posting and review, ledger management, statement generation.
- **Languages:** IELTS 7.5 (Reading 9.0); CET-4 and CET-6; Mandarin (native), English (professional working proficiency).

INTERNSHIP EXPERIENCE

China State Construction Eighth Engineering Division, New-Type Construction Co., Ltd. **Aug 2024 - Aug 2024**

Finance Intern | Finance and Treasury Department; project cost and reimbursement control

- Reviewed approximately 500 May-June vouchers and expense claims against reimbursement policy; codified recurring rejection reasons into a compliance checklist retained by the finance team for audit preparation.
- Reconciled project costs against operational records, surfacing 20 variances for follow-up before month-end close.

Reanda Certified Public Accountants LLP, Jiangsu Branch

Jun 2024 - Aug 2024

Audit Intern | Annual statutory audit of a state-owned urban development group, Jiangsu

- Sampled 300+ expense-cycle vouchers across travel, office and other expense accounts, tracing each to invoice, contract and general-ledger entry; verified exceptions with the client - missing supporting documents, incomplete approvals, invoice-to-contract mismatches - clearing or proposing each for adjustment before fieldwork close.
- Prepared 40+ audit working papers to the firm's indexing standard.
- Rebuilt client documentation into an indexed archive, enabling evidence to be retrieved by reference at review rather than re-requested.

DATA ANALYTICS PROJECTS

Singapore Government Procurement (GeBIZ) - Audit Analysis

Sep 2026 - Present

Python, pandas | github.com/CHANGPeijia-ACC/sg-procurement-analysis

- Analysed 18,464 public award records across 113 agencies and 6,152 suppliers (FY2021-FY2025, data.gov.sg), testing amount-weighted supplier concentration (HHI / CR4), award clustering around published procurement thresholds, and Benford's law conformity.
- Identified award amounts clustering below the S\$90,000 open-tender threshold, with the below-to-above ratio sharpening from 1.25x at plus or minus 10% to 1.61x at plus or minus 2%; documented the limits of each test and reported the results as audit screening signals rather than evidence.

Voucher Data Analysis Tool

Aug 2026 - Present

Python standard library | github.com/CHANGPeijia-ACC/voucher-analysis

- Built a dependency-free tool that takes a ledger and a bank statement and returns validation results, monthly and cross-tabulated summaries, per-account outlier flags and a reconciliation report.
- Set outlier thresholds per account rather than against a global mean, and keyed reconciliation on voucher number rather than row order, separating ledger-only from bank-only differences.

Workforce Scheduling Optimisation, NUA Library

Apr 2024 - Jun 2024

Course design competition, team of three | Second Prize (top 10%)

- Interviewed 20 library staff and collected shift, role and footfall data; constructed a staff $\times$ task efficiency matrix and generated a baseline roster using the Hungarian algorithm.
- Formulated and solved a mixed-integer program minimising workload inequity, idle hours and unmet demand under consecutive-shift and coverage constraints; overlaid a co-working exposure network, reducing the three highest departmental infection factors from 3.75 to 1.0 / 2.0 / 2.0.

Comparative Financial Analysis: Hengrui Pharmaceuticals and Fosun Pharma, FY2022-2023

Apr 2024 - Jun 2024

- Standardised accounting captions across both filers into one indicator framework spanning earnings quality, cash flow, DuPont decomposition and asset structure; adjusted for non-recurring items to isolate core profitability.

EDUCATION

Nanyang Technological University, Nanyang Business School

Aug 2026 - Jul 2027 (Expected)

MSc Accountancy (MACC), Data Analytics Specialisation

Nanjing University of Aeronautics and Astronautics (Project 211)

Sep 2021 - Jun 2025

Bachelor of Management, Accounting | GPA 3.5 / 5.0 (weighted average 85 / 100)

LEADERSHIP AND HONOURS

Student Union, College of Economics and Management, NUA

Sep 2021 - Jul 2022

Committee Member

- Coordinated the faculty sports meet (300 participants, 10+ events) and the university May Fourth Youth Torch Relay, directing venue arrangements and task allocation for 30 volunteers; named Outstanding Individual (top 10%).

Outstanding Student Scholarship, Third Class - top 10%, 2025 · Academic Scholarship, Second Class - top 15%, 2024
